

KATANTech Hand Sanitizer Features and Benefits

Long Lasting
Effective
Water-Based
Eco-friendly
Convenient
Shariah Compliant
Alcohol Free

Katan Tech Hand Sanitizers have significant advantages over alcohol hand sanitizers. A proprietary combination of **Benzalkonium Chloride** and **Polysilsesquioxane Steardimonium Chloride** in deionized water provides sanitizing and sustained protection. In addition, the products are **non-flammable, less drying** to skin, have an outstanding,

“**silky after-feel**” leading to continued usage, unlike the avoidance that alcohol-based products create because of skin drying and cracking.

Feature	Advantage	Benefit
Benzalkonium Chloride	<ul style="list-style-type: none"> Broad-spectrum efficacy Non-staining FDA compliant 	<ul style="list-style-type: none"> Effective antimicrobial Does not damage clothes or floor Not on banned substance list
Polysilsesquioxane Steardimonium Chloride	Durable protection	Cost reduction and minimizing
Water-based	<ul style="list-style-type: none"> Non-flammable, does not dry too quickly Solvent & VOC-free 	<ul style="list-style-type: none"> Safer Easier on skin, encourages use, Maintains skins natural protective sebum layer Allows product to sanitize correctly Environmentally responsible
Polysilsesquioxane Steardimonium Chloride SPADA	<ul style="list-style-type: none"> Durable protection Protective layer Non-mutagenic 	<ul style="list-style-type: none"> Cost reduction Protection between uses Protection even after hand washing Minimizes cross-contamination Excellent “after-feel” Does not create “super bugs”
